~~Indicates Matter Stricken~~

Indicates New Matter

The Senate assembled at 12:00 Noon, the hour to which it stood adjourned, and was called to order by the PRESIDENT.

A quorum being present, the proceedings were opened with a devotion by the Chaplain as follows:

Psalm 150:6

In Psalm 150 we read: "Let everything that breathes praise the Lord! Praise the Lord!"

Join me as we bow, if you will: O wondrous Lord, these days it almost feels as if the world around us is spinning madly out of control, and we find ourselves thinking, what truly is praiseworthy? Then, we pause, take a deep breath, and remember how very much there really is for which we need to give thanks. For this very Nation itself that we love, for the many caring and conscientious people who surround us -- and there are indeed so many. For each of these thoughtful and diligent Senators. And also for all of our Senate aides, as well as every other staff member, whatever his or her role, without whose efforts we would surely find ourselves adrift. So, Lord, in every regard, let us here in the Senate of South Carolina never fail to praise You. Your gifts to us truly are great, indeed. In Your loving name we pray, dear Lord. Amen.

The PRESIDENT called for Petitions, Memorials, Presentments of Grand Juries and such like papers.

~~—(2) a certificate may be granted if obtaining a certification of public convenience and necessity would permit the applicant to apply for, use, or leverage at least thirty percent of the construction costs of the small modular nuclear reactor by utilizing any benefits or incentives available~~

TUESDAY, APRIL 1, 2025

~~to lower the capital or operating costs including, but not limited to, governmental funds, tax credits, grants, and loan guarantees;~~

~~— (3) the costs and benefits of a small modular nuclear reactor are reasonable and prudent compared to the levelized costs of electricity generation from other resources, applying any governmental tax credits and incentives. ~~— (4) no more than three small modular nuclear reactors may receive a permit pursuant to this pilot program.~~

~~— (D) An application for this pilot program must include:~~

~~— (1) if the project's location:~~

~~— (a) is on or adjacent to an existing or former coal electrical generation site;~~

~~— (b) is on or adjacent to an existing nuclear facility;~~

~~— (c) enables coal plant retirement or emissions reduction in the electrical utility's or the South Carolina Public Service Authority's balancing area; or~~

~~— (d) supports diversity in energy production, reliability, and energy security;~~

~~— (2) if the project is subject to competitive procurement or solicitation for services and equipment;~~

~~— (3) a demonstration that the program's costs and benefits are reasonable and prudent and in the interest of South Carolina customers; and~~

~~— (4) any other information the commission may wish to include in the application.~~

~~Nothing in this subsection limits any factors that the commission may consider in its determination of an application.~~

~~— (E)(1) Reasonable and prudent costs incurred for a small modular nuclear reactor approved pursuant to this section shall be recoverable. In the event an electrical utility abandons a small modular nuclear reactor approved by the commission before its commercial operation, the electrical utility must provide a fulsome accounting to the commission of the circumstances of abandonment. Capital costs may only be recovered if the commission determines that the decision to abandon was reasonable, prudent, and in the public interest; however, these costs shall not include a rate of return. The commission may impose conditions it determines to be necessary to protect customers against unreasonable construction, development, or operational risk including, but not limited to, reporting, inspection, and the potential of requiring the utility to hire~~

TUESDAY, APRIL 1, 2025

~~an independent third party construction monitor to evaluate the prudence of the utility's actions and associated expense during the development of the project and construction of the reactor.~~

~~—(2) The commission must not allow any cost recovery related to a small modular nuclear reactor outside of a rate case.~~

~~(F)(1)(C)(1) In addition to the small modular nuclear facility pilot program,~~ Electrical utilities and the South Carolina Public Service Authority are encouraged to shall evaluate the potential for deploying small modular nuclear facilities at suitable sites within this State. A "suitable site" may include sites of current nuclear facilities, sites where nuclear facilities have been proposed but not constructed, and brownfield sites, such as coal generation sites.

(2) Such an evaluation may include cost estimates of further studies related to a potential small modular nuclear facility to serve customers in South Carolina. This includes, but is not limited to, planning, licensing, and project development, the anticipated timeline of an early site permit, current possibilities or barriers to co-ownership of such facilities, and available federal benefits which may defray costs of these facilities.

(3) Electric utilities and the Public Service Authority must provide reports on such evaluations to the Public Utilities Review Committee, the Nuclear Advisory Council, and the Public Service Commission by December 31, 2027. When evaluating the potential of a nuclear facility, the applicant must provide notice and annual progress reports to the Public Utilities Review Committee, the Nuclear Advisory Council, and the commission. When available, the applicant must also provide cost estimates of the studies related to a potential nuclear facility to serve customers in South Carolina. This includes, but is not limited to, planning, licensing, and project development, the anticipated timeline of an early site permit, and current possibilities or barriers to co-ownership of such facilities, and available federal benefits which may defray costs of these facilities.

~~—(3) In the event the commission finds cost estimates provided by an electric utility pursuant to item (2) are reasonable and prudent, the costs may be recoverable through rates, even if an application for a certificate of environmental compatibility and public convenience and necessity have not been filed. However, these costs shall not include a rate of return.~~

~~—(G) Nothing in this section relieves an electrical utility or the South Carolina Public Service Authority of the burden of filing for a certificate~~

The qualified independent third party shall submit all requests for documents and information necessary to their analysis under the authority of the commission and the commission shall have full authority to compel response to the requests. The qualified independent third party's duty will be to the commission. Any conclusions based on the evidence in the record and included in the report are intended to be used by the commission along with all other evidence submitted during the proceeding to inform its ultimate decision setting the avoided costs for each electrical utility. The utilities may require confidentiality agreements with the independent third party that do not impede the third-party analysis. The utilities shall be responsive in providing all documents, information, and items necessary for the completion of the report. The independent third party shall also include in the report a statement assessing the level of cooperation received from the utility during the development of the report and whether there were any material information requests that were not adequately fulfilled by the electrical utility. Any party to this proceeding shall be able to review the report including the confidential portions of the report upon entering into an appropriate confidentiality agreement. The commission and the Office of Regulatory Staff may not hire the same third-party consultant or expert in the same proceeding or to address the same or similar issues in different proceedings.

(J) Each electrical utility's avoided cost filing must be reasonably transparent so that underlying assumptions, data, and results can be independently reviewed and verified by the parties and the commission. If an electrical utility proposes an amount of solar or storage in a future integrated resource plan filing that is lower than the amount contained in the electrical utility's 2023 integrated resource plan as approved by the commission, the electrical utility shall include and analyze at least one scenario consistent with the electrical utilities' 2023 preferred resource portfolio that includes volumes of solar and storage consistent with that contained in the 2023 integrated resource plans as approved by the commission.

(B) The electrical utilities shall procure the resources referred to in subsection (A) through at least a biennial competitive procurement process consistent with the requirements of Sections 58-42-20 and 58-42-30, and in accordance with this section. The target volume in each competitive procurement shall be consistent with the volume of resources needed to be procured at that time to achieve the resource in-service dates specified in the electrical utility's 2023 integrated resource plan as approved by the commission or a subsequent integrated resource plan annual update as approved by the commission.

(C) The amount of renewable energy or energy storage resources required to be procured by each electrical utility pursuant to this section shall be reduced by the alternating current ("AC") nameplate capacity of any facility of the same resource type for which such electrical utility enters into a power purchase agreement after the effective date of this section pursuant to the electrical utility's mandatory purchase obligation under Public Utility Regulatory Policies Act or pursuant to a prior competitive procurement which had not resulted in an executed power purchase agreement prior to the enactment date of this section, provided that the facility is placed in service in 2035 or earlier.

(D) The target resource volumes for each competitive procurement shall reflect any increases or decreases included in the electrical utility's most recently approved integrated resource plan or integrated resource plan update. The electric utility may, at its option, include the procurement of non-renewable generation resources as part of its procurement of renewable and storage resources pursuant to this section.

(E) The target resource volumes for competitive procurement shall take into account any changes in siting opportunities that may be affected by local permitting, zoning, or other regulatory or legal challenges.

(F) The target resource volumes for competitive procurement by the electrical utility shall be increased to account for replacing megawatts associated with:

TUESDAY, APRIL 1, 2025

(1) any inability by the electrical utility to reach target procurement volumes in prior procurement cycles;

(2) the inability of renewable energy or energy storage resources procured in any prior procurement cycles to be placed in service; and

(3) the expiration of any existing contracts for qualifying facilities pursuant to the Public Utility Regulatory Practices Act.

All target resource volumes referenced in this subsection shall be consistent with the needs identified in the most recently commission approved integrated resource plan or integrated resource plan update.

(G) Prior to making final awards in a competitive procurement, the electrical utility shall confirm that the resources selected are cost effective using methodologies and current inputs reflected in the applicable integrated resource plan or integrated resource plan update approved by the commission for that electrical utility.

(H) Notwithstanding the other subsections of this section, the results of competitive procurements within an electrical utility's balancing area outside of South Carolina that serve customers in the electrical utility's balancing area within South Carolina shall be approved or accepted by the commission as specified in 58-42-20(G).

(I) Notwithstanding Section 58-41-20(F)(2), electrical utilities shall continue to offer to qualifying small power production facilities power purchase agreements for the purchase of energy and capacity at avoided cost, with commercially reasonable terms and a duration of up to ten years, until the competitive procurement requirements of this section have been satisfied.

Section 58-42-20. (A) For purposes of this chapter:

(1) "Electrical utility" shall be defined as in Section 58-27-10, provided, however, that electrical utilities serving less than 100,000 customers shall be exempt from the provisions of this chapter unless otherwise provided.

(2) "Energy storage facility" means commercially available technology that can absorb energy and store it for later use, including, but not limited to, electrochemical, thermal, and electromechanical technologies but not including pumped hydroelectric facilities.

(3) "Renewable energy facility" has the same meaning as defined in Section 58-39-120(E).

(4) "Renewable energy resource" has the same meaning as "renewable generation resource" as defined in Section 58-39-120(F).

(B) Unless an electrical utility makes an application pursuant to subsection (G), electrical utilities shall file for commission approval a program for the competitive procurement of renewable energy resources

TUESDAY, APRIL 1, 2025

and such amount of associated co-located energy storage facilities as determined by the commission to meet needs for new generation and energy storage resources identified by the electrical utility's integrated resource plan or other planning process. A competitive procurement program may be used to procure any subset of energy, capacity, ancillary services, and environmental and renewable attributes. The commission may not grant approval of the program unless it finds that the electrical utility has satisfied all the requirements of this section and that the proposed program is in the best interests of the customers of the electrical utility. Co-located energy storage facilities, if included in the solicitation, must be associated equipment located at the same site as the renewable energy facility.

(C) Electrical utilities shall procure renewable energy resources and co-located energy storage facilities, or the output of such facilities, subject to the following requirements:

(1) Renewable energy and co-located energy storage resources, or their output, procured by electrical utilities shall be procured via a competitive solicitation process open to all market participants that meet minimum eligibility requirements.

(2) The electrical utility shall issue public notice of its intention to issue a competitive renewable energy and co-located energy storage solicitation, or both, at least ninety days prior to the commencement of each solicitation. This notice must include the proposed procurement volume, process, and timeline.

(3) The electrical utility shall provide a reasonable period of time for interested parties to review and comment on proposed requests for proposals, bid instructions, and bid evaluation criteria, and for commission approval, prior to finalization and issuance.

(4) Renewable energy facilities eligible to participate in a competitive procurement are those that use renewable energy resources.

(5) Energy storage facilities eligible to participate in a competitive procurement are those identified in Section 58-42-20(A)(2) installed and operated in conjunction with a renewable energy facility.

(6) The electrical utility shall be required to use an independent evaluator or independent administrator to oversee or manage the competitive procurement, as determined appropriate by the commission.

(7) The procurement of renewable energy facilities and co-located energy storage facilities and the output of such facilities shall result in a reasonable balance of electrical utility and independent third-party ownership of eligible facilities, as determined by the commission. The electrical utility and its affiliates may offer proposals into the

TUESDAY, APRIL 1, 2025

competitive procurement provided that appropriate safeguards are in place to ensure that such proposals do not receive any advantage in the bid evaluation process.

(D) An electrical utility shall make publicly available at least forty-five days prior to each competitive solicitation:

(1) A commission-approved pro forma contract to inform prospective market participants of the procurement terms and conditions. The pro forma contract must: (i) include standardized and commercially reasonable requirements for contract performance security consistent with market standards; and (ii) define limits and compensation for resource dispatch and curtailment.

(2) A bid and portfolio evaluation methodology that: (i) ensures all bids are treated equitably, including price and nonprice evaluation criteria; and (ii) ensures electrical utility and independent third-party owned facilities are treated equitably with regards to resource dispatch and curtailments.

(3) Interconnection requirements including specification of how bids without existing interconnection studies must be treated for purposes of evaluation.

(E) After bids are submitted and evaluated, final winning bids will be selected based upon the published evaluation methodology.

(F) An electrical utility shall issue a public report summarizing the results of each competitive solicitation within sixty days of the award notifications. The report shall include, at minimum, a summary of the submitted bids and an anonymized list of the project awards, including their size, location, average award price and tenor, and award price range. Electrical utilities are permitted to recover costs incurred through such competitive procurement through rates established pursuant to Section 58-27-865 or Section 58-27-870.

(G) Notwithstanding the requirements of Section 58-42-10 and this section, the commission shall approve an electrical utility's competitive procurement of energy storage facilities or renewable energy resources and the output of energy storage facilities or renewable energy resources within an electrical utility's balancing area outside of South Carolina that serve customers within South Carolina if eligible energy storage facilities or renewable energy resources located within South Carolina were allowed to participate in the competitive procurement and if the commission determines that the results of such procurement are in the public interest and enable the economic, reliable, and safe operation of the electric grid. Electrical utilities shall be permitted to recover costs incurred through such competitive procurements through rates

TUESDAY, APRIL 1, 2025

established pursuant to Section 58-27-865 or Section 58-27-870. However, if the commission determines that the results of the procurement are not in the public interest for South Carolina, then the costs and benefits associated with such procurement shall be allocated away from South Carolina customers.

(H) The commission is authorized to adopt rules or procedures for conducting a procurement authorized by this section.

Section 58-42-30. (A) Within six months from the date of the enactment of this chapter, the commission shall open a docket to establish a competitive procurement program for each electrical utility for energy storage facilities to be located in South Carolina. Solicitations shall be subject to the following limitations:

(1) For transmission-connected energy storage (excluding pumped hydro) the electrical utilities shall conduct a competitive procurement for such resources, including utility-self developed projects. Each electrical utility shall file the proposed details of its competitive procurement process no later than twelve months after the date of the enactment of this chapter.

(2) The target procurement volume for stand-alone storage acquisition may not exceed the portion of stand-alone storage in the most recent commission approved integrated resource plan or integrated resource plan annual update that is equal to the portion of the respective electrical utility's peak load attributable to South Carolina customers.

(3) Stand-alone energy storage facilities with a design capacity less than or equal to twenty megawatts and intended primarily to address local reliability improvements or local capacity constraints are not subject to the competitive procurement requirements of this section.

(4)(a) The procurement of stand-alone energy storage facilities shall result in a reasonable balance of the electrical utility and independent third-party ownership of eligible facilities, as determined by the commission.

(b) An electrical utility and its affiliates may offer proposals into the competitive procurement provided that appropriate safeguards are in place to ensure that such proposals do not receive any advantage in the bid evaluation process. Electrical utility costs associated with facilities owned by an independent third-party power producer shall be capitalized and included within the electrical utility's rate base for ratemaking purposes.

(B) Competitively procured stand-alone storage shall be subject to operational protocols, equipment specifications and inspections established by the electric utility and which are necessary to ensure the

TUESDAY, APRIL 1, 2025

reliability of the electrical utility system. Information regarding competitively procured stand-alone storage must be provided to the Office of Regulatory Staff.

(C) Electrical utilities may recover costs incurred through such competitive procurement through rates established pursuant to Section 58-27-870.

SECTION X. Section 58-31-227(B) of the S.C. Code is amended to read:

(B) The Public Service Authority shall procure renewable energy resources subject to the following requirements:

(1) Renewable energy resources procured by the Public Service Authority shall be procured via a competitive solicitation process open to all independent market participants that meet minimum eligibility requirements.

(2) The Public Service Authority shall issue public notification of its intention to issue a competitive renewable solicitation at least ninety days prior to the release of each solicitation, including the proposed procurement volume, process, and timeline.

(3) Renewable energy facilities eligible to participate in a competitive procurement are those ~~that have a valid interconnection request on file~~ and that use renewable energy resources identified in Section 58-39-120(F) and may include battery storage devices ~~charged exclusively by renewable energy~~.

being retired, abandoned, brownfield, downrated, mothballed, or dedicated to standby or emergency service at the same site, limited to facilities no more than 300 megawatts for non-nuclear generation, so long as those new facilities will provide an amount of effective load-carrying capacity that in whole or in part will serve to replace the capacity to be lost as a result of retirement, capacity lost as a result of abandonment, or in the case of nuclear generation, will serve to provide the facility and includes associated transmission facilities needed to deliver power from that facility to customers. A “like facility” with reference to transmission facilities, and without limitation, includes any facility that represents the rebuilding, reconductoring, paralleling, increasing voltage, adding circuits or otherwise reconfiguring of an existing transmission line or other transmission facilities including, without limitation, projects to increase the capacity of such facilities, provided such facilities are: (a) located materially within a utility right of way or corridor; or (b) substantially located on the property of a customer, prospective customer, or the State.

Amendment No. 10

Senator YOUNG proposed the following amendment (SR-3309.KM0004S), which was carried over:

TUESDAY, APRIL 1, 2025

Amend the bill, as and if amended, by adding an appropriately numbered SECTION to read:

SECTION X. Chapter 27, Title 58 of the S.C. Code is amended by adding:

Article 24

Electric Rate Stabilization Act

Section 58-27-2700. A public utility providing retail electric service, in its discretion and at any time, may elect to have the terms of this article apply to its rates and charges for retail electric service, on a prospective basis, by filing a notice of the election with the commission and on the same day and by the same means serving a copy on the Office of Regulatory Staff. Upon receipt of notice of the election, the commission shall proceed to make the findings and establish the ongoing procedures required for adjustments in base rates to be made under this article. In carrying out the procedures established by this article with respect to such an election, the commission shall rely upon and utilize the approved rates, charges, revenues, expenses, capital structure, returns, and other matters established in the public utility's most recent general rate proceeding pursuant to Section 58-27-860; provided, however, that the most recent order must have been issued no more than five years prior to the initial election to come under the terms of this article and the utility must file an application for a general rate proceeding every five years after such election. A public utility may combine an election under this article with the filing of a rate proceeding pursuant to Section 58-27-860. The commission shall include the findings required by this article in its rate orders issued in the Section 58-27-860 proceedings, and the election shall remain in effect until the next general rate proceeding.

Section 58-27-2710. The election by a utility to have the terms of this article apply to its rates and charges for retail electric service once made shall remain in effect until the next general rate proceeding for the public utility under Section 58-27-860, at which time the public utility may then elect to continue the applicability of this article to its rates and charges or elect to opt out of the provisions of this article. The applicant may withdraw its request to come under the terms of this article at any time before the entry of a final order of the commission on the merits of the proceeding in which the election is made or on a petition for rehearing in the proceeding.

Section 58-27-2720. In issuing its order pursuant to Section 58-27-2710, and in addition to the other requirements of Section 58-27-2710, if a proceeding pursuant to that section is required, then:

TUESDAY, APRIL 1, 2025

(1) the commission shall specify a range for the utility's cost of equity that includes a band of fifty basis points (0.50 percentage points) below and fifty basis points (0.50 percentage points) above the cost of equity on which rates have been set; and

(2) the commission separately shall state the amount of the utility's net plant in service, construction work in progress, accumulated deferred income taxes, inventory, working capital, and other rate base components. It also shall state the utility's depreciation expense, operating and maintenance expense, income taxes, taxes other than income taxes, other components of income for return, revenues, capital structure, cost of debt, overall cost of capital, and earned return on common equity. The figures stated shall be those which the commission has determined to be the appropriate basis on which rates were set in the applicable orders.

Section 58-27-2730. The utility shall file with the commission monitoring reports for each twelve-month period ending on March 31, June 30, September 30, and December 31 of each year, the filings to be made no later than the fifteenth day of the third month following the close of the period. The utility shall serve a copy of such reports on the Office of Regulatory Staff on the same day and by the same means as they are provided to the commission. These quarterly monitoring reports shall include:

(1) the utility's actual net plant in service, construction work in progress, accumulated deferred income taxes, inventory, working capital, and other rate base components. The report shall also show the utility's depreciation expense, operating and maintenance expense, income taxes, taxes other than income taxes, other components of income for return, revenues, capital structure, cost of debt, overall cost of capital, and earned return on common equity;

(2) all applicable accounting and pro forma adjustments historically permitted or required by the commission for the utility in question or for similarly situated utilities, authorized by general principles of utility accounting, or authorized by accounting letters or orders issued by the commission. This authorization may occur either in a general rate hearing or in any other type of filing or hearing that the commission considers appropriate. However, other parties shall be given sufficient opportunity to review and provide comments on any proposed accounting letter or order issued after the initial order allowing future base rate adjustments pursuant to this article;

(3) pro forma adjustments to annualize for the twelve-month period any rate adjustments imposed pursuant to this article or other events

TUESDAY, APRIL 1, 2025

affecting only part of the period covered by the filing so that the annualization is required to show the effects of those events on the utility's earnings going forward; and

(4) pro forma or other adjustments required to properly account for atypical, unusual, or nonrecurring events.

Section 58-27-2740. (A) In the monitoring report filed for the twelve-month period ending December thirty-first of each year, the utility shall provide additional schedules indicating the following revenue calculations:

(1) if the utility's earnings exceed the upper end of the range established in the order, then the utility shall calculate the reduction in revenue required to lower its return on equity to the midpoint of the range established in the order; or

(2) if the utility's earnings are below the lower range established in the order, then the utility shall calculate the additional revenue required to increase its return on equity to the midpoint of the range established in the order.

(B) The utility also shall provide a schedule that specifies changes in its tariff rates required to achieve any indicated change in revenue.

(C) The proposed rate changes, filed by the utility, shall conform as nearly as is practicable with the revenue allocation principles contained in the most recent rate order.

Section 58-27-2750. The Office of Regulatory Staff shall review the monitoring report filed pursuant to Section 58-27-2730 and Section 58-27-2740 to determine compliance with its terms, taking into account the findings of any audit conducted by the Office of Regulatory Staff concerning compliance with Section 58-27-2730 and Section 58-27-2740. The Office of Regulatory Staff shall propose those adjustments it determines to be required to bring the report into compliance with Section 58-27-2740. Based upon that report and the findings of any audit conducted by the Office of Regulatory Staff, the commission shall order the utility to make the adjustments to tariff rates necessary to achieve the revenue levels indicated in Section 58-27-2740.

Section 58-27-2760. The procedures contained in this section shall apply to monitoring reports related to the quarter ending December 31.

(1) The utility shall file the monitoring reports annually with the commission and Office of Regulatory Staff on or before March 15.

(2) In cases where the monitoring report indicates rate adjustments are required, or where it otherwise appears to the commission or the Office of Regulatory Staff that an adjustment in rates may be warranted under this article, the commission shall issue a Notice of Filing annually on or

TUESDAY, APRIL 1, 2025

before March 31 and require interested persons to file a petition to intervene annually on or before May 15. The commission shall maintain a register of parties who have notified the commission in writing that they wish to be provided with any Notice of Filing related to specified utilities and the commission shall use reasonable efforts to provide such parties with Notices of Filing by such utilities, provided that the failure to do so shall not invalidate any subsequent proceedings. Intervenors shall have discovery rights related to the matters set forth in Section 58-27-2730.

(3) The Office of Regulatory Staff shall conduct an audit of the monitoring report to ascertain the reasonableness and prudence of all matters contained therein and specify any changes that the Office of Regulatory Staff determines to be necessary to correct errors in the report or to otherwise bring the report into compliance with this article. The Office of Regulatory Staff's audit report shall be verified and provided to the commission and to the utility and made available annually to all parties of record no later than June 1. Other parties of record shall also be allowed until June 1 of each year to file verified written comments and submit documentary evidence to the commission and the Office of Regulatory Staff in response to the utility's monitoring report.

(4) The utility shall be allowed until June 15 of each year to file verified written comments and submit documentary evidence to the commission and the Office of Regulatory Staff related to the utility's monitoring report and may request a non-evidentiary hearing before the commission concerning the utility's monitoring report.

(5) On or before July 15 of each year, the commission shall issue an initial order setting forth any changes required in the utility's request to adjust rates under this article (the "Initial Order"). In the absence of such an Initial Order, the electric rate adjustment contained in the utility's filing shall be considered granted as filed.

(6) Any electric rate adjustments authorized under the terms of this article shall take effect for all bills rendered on or after the first billing cycle of August of that year.

Section 58-27-2770. In calculating its revenue requirement under Section 58-27-2730, and apart from the recovery of a return on construction work in progress, an electric utility may not include in plant service its investments in any new electric generating facility of more than two hundred fifty megawatts, or the costs associated with operating such a facility, except through a general electric rate proceeding under Section 58-27-860 and Section 58-27-870 or through a contested case

TUESDAY, APRIL 1, 2025

proceeding for the limited purpose of establishing the prudence of the facility under this section.

Section 58-27-2780. Within thirty days of the issuance of an Initial Order pursuant to Section 58-27-2760, or within thirty days of the failure by the commission to issue an order as required pursuant to Section 58-27-2760, any aggrieved party may petition the commission for review of the Initial Order or failure to issue an order and all interested parties of record shall have a right to be heard at an evidentiary hearing on the matter. The party shall serve a copy of such petition on the Office of Regulatory Staff and other parties of record on the same day and by the same means as it is provided to the commission.

Section 58-27-2790. (A) After conducting the hearing required by Section 58-27-2780, the commission shall issue a final order that:

(1) sets forth any changes that are required to the rates approved in the Initial Order issued under Section 58-27-2760(5);

(2) determines the amount of any overcollection or undercollection by the utility that resulted from collection of the rates authorized in the Initial Order as compared to the rates authorized in the final order issued under this section; and
